

MatchRite W80 Series

The Latest in color matching technology

The W80 Series offers the best equipment in color matching, the MatchRite iVue, a versatile non-contact spectro, which offers the smallest aperture size in color matching. The MatchRite iVue is revolutionary in its ability to measure almost anything, like wetpaint samples, large bulky objects, and can even pick out a color in a pattern. This easy to use spectro helps increase in-store uptime, while reducing service cost and overall cost of ownership. Also included in the W80 series is the brand new ColorDesigner® PLUS, a versatile color matching software package, will allow for quick and easy color matching for customers. In addition a computer, monitor, and label printer are also available in some of the W80 packages.

MatchRite W80 Series

MatchRite iVue

Versatile portable non-contact spectro allows for color matching on just about any customer sample with the smallest aperture size in color matching, the MatchRite iVue can even pick a color out of a pattern.

- With ColorDesigner PLUS, color matching software, the iVue is a powerful tool for servicing your customers.
- Line of Sight Sample viewing provides fast and easy measurements on any sample, even those odd-shaped, large or bulky samples. target exactly the spot you want to measure. No more guess work.
- Innovative LED Spectral Engine delivers superior color match, especially on reds, blues and dark colors. And, the LED illumination will provide years of uninterrupted service and repeatable performance.
- Improves your customer's experience.
- Sample surface, keeping the lenses clean and free of wet paint and reducing service costs over the life of the instrument.

ColorDesigner PLUS Software

A customer and retailer friendly color matching software package that produces expert results ColorDesigner PLUS expedites and refines the paint selection process, eliminating wasted effort, needless formulation errors and connects to any paint dispenser. And it allows you to mix your customer's colors in the paint product they want. With one efficient package, your paint department becomes a color design center.

Dual aperture sizes (shown actual size)

With the adjustable apertures you can easily adjust between 2 sizes with the click of a button. Also, with sheen detection you no longer have to guess the sheen of tiny samples. The iVue does it for you!

The iVue has a zero touch sample measurement process. A circular beam of light is projected on to your sample allowing you to accurately line up the measurement. This ensures accuracy and helps to avoid paint and debris from getting inside your Spectro.
