

# MatchRite CPU Upgrade Program

## Upgrade your system without breaking a sweat!

The CPU Upgrade can be your best option for updating your MatchRite system when your Spectrophotometer is still working well but you wish to upgrade to the new ColorDesigner Plus software. Customers with older computer hardware are encouraged to go with the CPU Upgrade program to avoid hardware-based complications related to under powered computer components. ColorDesigner Plus utilizes the latest technology to bring you an unparalleled level of color match quality and speed coupled with a simple but powerful user interface. Get it all in one place with the CPU Upgrade!

## MatchRite ColorDesigner Plus

**What do your customers want when they come to your paint department?**

**Answers,** responsive service and convenience.

The confidence they can find the colors they need to make their ideas come to life. They want you to be the expert who can provide the right answers, the service, and the assurance they've come to the right place...each time they visit your store.

We can help. X-Rite's ColorDesigner® PLUS color

matching software is a customer- and retailer-friendly package that produces expert results in flexible, adaptable workflow format you can set up and use any way you need it.

ColorDesigner PLUS expedites and refines the paint selection process, eliminating wasted effort, needless formulation errors and connects to any paint dispenser. And it allows you to mix your customer's color in the paint product they want. With one efficient package, your paint department becomes a color design center.

## DYMO 450 Turbo Label Printer

All WCPU Upgrades feature Windows 7. Unfortunately DYMO did not produce printer drivers for Windows 7 for printers older than the 400 Turbo. If you have a 320 or 300 you will need a new printer.

Includes the following:

- DYMO LabelWriter 450 Turbo
- Up to 71 labels per minute
