To schedule the installation of your new dispenser, complete and return to: fusinstallation@idexcorp.com

Power Requirements:
Fluid Management requires that each dispenser has its own dedicated power line. (Do not plug shakers into the same outlet) It is also recommended to use power strip surge protector to protect the computer from power surges.

Staging Area Checklist – These items must be on site or in place

Initial	Item Requirement
	Dispenser is on site
	2 quarts of each colorant
	Dedicated electrical outlet available
	Required Computer Components (PC, monitor, mouse & keyboard)

PC requirements for systems not purchased through Fluid Management

Component	Model	Details
Processor	*Quad Core*	*1/6 GHz Quad Core minimum*
Memory		*4 Gig minimum*
Hard Drive	*SATA*	*160 GB minimum*
USB 2.0 Ports	*USB*	*6 ports minimum*
Serial Port		*1Cat5 port*
Windows Operating System	*Windows*	*Win 10 Professional only, 64 bit*

Color Matching System   **PLEASE NOTE THAT THIS SYSTEM IS NOT FLUID MANAGEMENT EQUIPMENT. OUR AUTHORIZED TECHNICIAN WILL ATTEMPT TO INSTALL AND COMPLETE THE INTEGRATION. IF ANY ISSUES ARISE THAT REQUIRE ADDITIONAL SUPPORT FROM THE COLOR MATCH VENDOR IT WILL BE THE RESPONSIBILITY OF THE CUSTOMER TO CONTACT THAT VENDOR.**

Note: Please allow 4-5 business days for FM to attempt to schedule a technician for your install. We will usually be able to schedule this within 4-5 business days after we receive this form back, but it can take longer depending on technician availability.

- Older versions of color match software should be updated prior to install of new dispenser
- Spectrometer needs to be within 25 ft. of dispenser to avoid requirement of longer network cable
- If color matching system is not on site during the install, customer will contact color matching vendor to complete setup. (If this system is not onsite during install, FM does not return to install this)
- Full comprehensive training on color matching system to be provided by color matching vendor or paint rep. Fluid Management will only be able to provide limited training.

I have gathered all items on the "Staging Area Checklist" and our store is ready to schedule a technician. By signing, I realize that if the technician finds that any of the requirements have not been met, the installation could be rescheduled. Fluid Management reserves the right to bill for the technician's return time and travel when the requirements have not been met.
